Access to PPE Gear

We have been advised by a number of practitioners that it is proving very difficult to access the appropriate PPE gear. We have spoken to Government Officials about this issue. They have advised that the Government is acutely aware of the PPE situation and is taking steps to address it. Unfortunately there is no mechanism at this point in time for essential service providers (outside the Health Sector) to get preferential access to PPE. We recommend that you continue to work with your existing suppliers to secure the appropriate equipment. If we receive any new information about availability of that equipment we will update you with that information.
